HEMADRI REDDY

Senior Software Test Engineer | SDET (Playwright • JavaScript • Selenium • Java • API • CI/CD)

Bengaluru, India | +91-7702341425 | hemadri.thokala770@gmail.com | linkedin.com/in/hemadrireddy | github.com/Hemadri-R

PROFESSIONAL SUMMARY

Senior Software Test Engineer / SDET with 3.4+ years of experience designing, maintaining, and debugging scalable end-to-end test automation frameworks for modern enterprise web and AI-powered applications. Proven expertise in **Playwright (JavaScript / Node.js)** and **Selenium WebDriver (Java)** using **Page Object Model (POM)** and **Cucumber BDD**, alongside **REST API testing (Postman, REST Assured, Swagger)**, SQL verification, and **CI/CD pipeline integration (GitHub Actions, GitLab CI, Jenkins)**. Practical practitioner of **AI-assisted quality engineering and Model Context Protocol (MCP) workflows** (Antigravity, Cursor, Chrome DevTools MCP, ClickUp MCP) to accelerate test scenario design, synthetic dataset generation, live DOM/network root-cause debugging, and continuous quality delivery.

TECHNICAL SKILLS

UI & E2E Automation:	**Playwright** (JavaScript / Node.js), **Selenium WebDriver** (Java), Cross-Browser & Parallel Execution (BrowserStack)
Frameworks & Architecture:	**Page Object Model (POM)**, **Cucumber.js / Cucumber-JVM (BDD)**, Gherkin, CustomWorld, TestNG, JUnit, Data-Driven Testing
Languages & Scripting:	**JavaScript (ES6+)**, **Node.js**, **Core Java (Java 17–21)**, Python (Scripting & Test Utilities), SQL, HTML5/CSS3/XPath Selectors
API & Backend Testing:	**Postman**, **REST Assured**, Swagger / OpenAPI, RESTful Payload & Schema Validation, Auth (OAuth/JWT/Bearer), Request Chaining
CI/CD, Reporting & DevOps:	**GitHub Actions**, **GitLab CI/CD**, **Jenkins**, Git, **Allure Reports**, Cucumber HTML/JSON Reports
AI-Assisted QA & MCP Tools:	**Chrome DevTools MCP** (Live DOM/Network Inspection), **ClickUp MCP**, AI Coding Agents (Antigravity, Cursor, Claude), Modular Agent Skills
Testing & Defect Tracking:	Functional, Regression, Smoke, Integration, End-to-End (E2E), Multi-Role RBAC Testing, **Jira**, **ClickUp**, SwiftEnterprise, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior Software Test Engineer (SDET) — Vitra.ai (Bengaluru, India) **Jun 2023 – Present**

Enterprise AI-Powered Multilingual Media, Document & Translation Platform

- **Framework Architecture & Design:** Architected and maintained production-grade end-to-end test automation frameworks using **Playwright (JavaScript / Node.js)** and **Selenium WebDriver (Java)** built on the **Page Object Model (POM)** pattern with **30+ reusable Page Object classes** and **25+ modular step definition suites**.
- **Behavior-Driven Development (BDD):** Implemented scalable **Cucumber.js BDD** test suites utilizing structured Gherkin feature specifications, Scenario Outlines, centralized `CustomWorld` state management, and `Before`/`After` lifecycle hooks.
- **End-to-End Product & RBAC Coverage:** Automated E2E regression and smoke workflows across **8 core product modules** (Translation Memory, Term Bases, Glossaries, Style Guides, Image Workflows, Video Dubbing, Document Translation, Text-to-Speech) and **6 RBAC user roles** (Owner, Admin, Project Manager, Editor, Viewer, Custom Role).
- **AI-Assisted Testing & MCP Engineering Workflows:** Leveraged AI agents (**Antigravity, Cursor, Claude**) and **Model Context Protocol (MCP)** tools—specifically **Chrome DevTools MCP** for live DOM/network inspection and exploratory verification, and **ClickUp MCP** for automated defect logging—alongside 26 modular agent skills and Python utilities to accelerate test scenario authoring, generate complex synthetic test datasets (deeply nested multilingual JSON/DOCX fixtures), debug flaky locators, and reduce manual validation effort.
- **API & Integration Testing:** Conducted REST API functional, integration, and contract validation using **Postman, REST Assured, and Swagger**, verifying status codes, JSON/XML response schemas, authentication tokens, and backend data integrity across microservices.
- **CI/CD & Observability:** Integrated headless parallel test execution into **GitLab CI, GitHub Actions, and Jenkins** pipelines, reducing regression turnaround time and configuring dual **Allure Reports** and **Cucumber HTML/JSON reports** with failure categorization, run history trends, and automated failure screenshots.
- **Cross-Browser & Release Quality:** Executed cross-browser compatibility suites via **BrowserStack** and partnered with developers in Agile sprints using **Jira and ClickUp** for root-cause analysis (RCA) and release sign-off.

Automation Test Engineer (Intern) — Digite Infotech (NimbleWork) (Bengaluru, India) **Oct 2022 – Apr 2023**

Project: SwiftEnterprise — Agile & Kanban Application Lifecycle Management (ALM) Platform

- Developed and maintained automated UI and functional regression test scripts for **SwiftEnterprise** and Kanban workflow modules using **Selenium WebDriver (Java)** and the **TestNG** framework.
- Implemented **Page Object Model (POM)** and data-driven test suites to improve locator maintainability and code reusability across sprint planning, Kanban board, and enterprise reporting views.
- Executed smoke, functional, regression, integration, and cross-browser test cycles across staging environments; logged, tracked, and verified defects in **SwiftEnterprise** during Agile sprint ceremonies.

KEY AUTOMATION PROJECTS & OPEN-SOURCE PORTFOLIO

1. Universe End-to-End Test Automation Framework (Playwright + Cucumber.js BDD) | Jun 2023 – Present

github.com/Hemadri-R/Uni-Test-Automation-Framework

- Production-grade Playwright + Cucumber.js BDD automation architecture in JavaScript (Node.js) featuring **30+ POM classes**, **25+ step definition modules**, `CustomWorld` context, multi-environment `.env` configuration, 6-role RBAC coverage, and dual Allure + Cucumber HTML reporting.

2. TP Web Application Test Automation Suite (Playwright + JavaScript + BDD) | Jan 2025 – Present

github.com/Hemadri-R/TP-Playwright-Test-Automation-

- Modular end-to-end web automation framework built with Playwright, JavaScript, and Cucumber BDD using Page Object Model (POM), centralized Page Object caching (`objectHandler`), reusable Gherkin step definitions, and custom lifecycle hooks.

3. SwiftEnterprise Agile & Kanban Automation Suite (Selenium + Java + TestNG) Oct 2022 – Apr 2023

- Automated UI regression and data-driven test cases for Kanban board transitions, work-item tracking, and Agile project modules using Selenium WebDriver, Core Java, TestNG, and POM.

EDUCATION & CERTIFICATIONS

Bachelor of Science (B.Sc.) in Computer Science & Technology — SEICOM Degree College, Tirupati (80%) 2017 – 2021

- **Certifications:** Playwright JS/TS Automation Testing from Scratch & Framework (Udemy) • Prompt Engineering for Quality & Engineering Workflows (Coursera)
- **Languages:** English (Full Professional), Telugu (Native), Kannada (Conversational)
